

Michael Fingerhut

Michael Fingerhut, a trained mathematician and computer scientist, is the director of the Multimedia Library and Engineering Bureau of IRCAM in Paris, where he manages collection and infrastructure development. He is a specialist in the design and development of digital and hybrid libraries, metadata modelization and interoperability of heterogeneous information systems. His most recent projects include an in-house workflow for the preservation, documentation and online distribution of the IRCAM sound archives, and of a portal to contemporary music resources in France. He is a member of the User Advisory Board of The European Library, and of the Core Expert Group of Europeana 1.0. He is a member of the Steering Committee of ISMIR, a yearly international conference on music information retrieval. He is the editor of the electronic newsletter of IAML (International Association of Music Libraries, Archives and Documentation Centres). He is consulted as expert advisor in other national and international technological infrastructure projects.
